Professional Summary

Computer Science undergraduate specializing in Artificial Intelligence and Machine Learning with hands-on experience in building scalable ML models, deep learning systems, and AI-driven applications. Proficient in Python, Java, and cloud-based deployment with strong foundations in data structures, algorithms, and software development. Developed real-world projects including fraud detection, brain tumor classification, and AI-based trading systems.

Technical Skills

Programming: Python, Java, SQL, HTML, CSS

AI/ML: Machine Learning, Deep Learning (CNN), Reinforcement Learning (DQN, PPO), NLP (Sentiment Analysis), Model Evaluation, Overfitting Handling

Data & Analytics: Pandas, NumPy, Matplotlib, Data Cleaning, Feature Engineering, Exploratory Data Analysis

Web & Backend: Node.js, REST APIs, Full Stack Development (Basic)

DevOps & Cloud: Git, GitHub, Google Cloud Platform, CI/CD Fundamentals, Deployment Basics

Core CS: Data Structures, Algorithms, Operating Systems, DBMS, Computer Networks

Tools: VS Code, Jupyter Notebook, Visual Studio

Projects

Credit Card Fraud Detection System 2025

- Developed a fraud detection model using Random Forest on financial datasets with **94% accuracy**.
- Performed data preprocessing, feature selection, and handled class imbalance for improved performance.
- Used Python, Pandas, NumPy, and Scikit-learn for model development.

Brain Tumor Detection using CNN 2025

- Built a CNN model for MRI image classification achieving **91% validation accuracy**.
- Applied image preprocessing and augmentation to improve generalization.
- Implemented using TensorFlow/PyTorch for training and evaluation.

Personal AI Voice Assistant 2026

- Developed an AI-powered voice assistant using **speech recognition and natural language processing**.
- Enabled real-time voice commands, automatic language detection, and response generation.
- Integrated APIs for task automation such as search, system commands, and information retrieval.
- Improved interaction accuracy through preprocessing and command optimization techniques.

Stock Prediction System 2026

- Built a hybrid model combining Reinforcement Learning and NLP-based sentiment analysis.
- Improved prediction performance by **18% over baseline models**.
- Deployed using DevOps workflows for monitoring and continuous updates.

Doorstep Medicine Delivery System 2026

- Developed a full-stack medicine ordering platform with REST APIs.
- Implemented backend workflows for order processing and tracking.
- Improved deployment reliability using CI/CD-inspired automation practices.

Experience

AI/ML Internship – Agartas Academy Pvt Ltd

Jul 2024 – Sep 2024

- Built and evaluated machine learning models using real-world datasets.
- Performed data preprocessing, feature engineering, and model optimization.
- Improved analytical and problem-solving skills through practical implementation.

Marketing Intern – Bounten

June 2024

- Assisted in planning and executing digital marketing campaigns to increase brand awareness.
- Managed and analyzed social media engagement to improve audience reach.
- Collaborated with cross-functional teams to support campaign strategies and client interactions.
- Developed communication, analytics, and client-handling skills in a professional environment.

AICTE Virtual Internship

2024

- Worked on industry-level problem-solving tasks and technical implementations.

Industrial Training Program

2024

- Learned practical implementation of software development and core CS concepts.

Education

B.Tech in Computer Science

Aug 2023 – May 2027

SR University, Warangal

Intermediate (MPC)

2021 – 2023

SR Dhruva Jr College

SSC

2010 – 2021

Kakatiya Brilliant Star High School

Certifications

- AI & Machine Learning Certification
- Data Analytics Essentials
- Generative AI Fundamentals
- Java Programming (Basic)
- Computer Networks & Networking Basics
- Endpoint Security
- Junior Cybersecurity Analyst Path
- Probability & Statistics for Data Science
- Operating Systems Fundamentals

Leadership & Responsibilities

Model United Nations (MUN) – Marketing Head & Scribe

2025

- Led marketing campaigns and improved engagement.
- Coordinated operations for 1100+ delegates.
- Awarded **Best Director**.

Model United Nations (MUN) – IP Reporter

2024

- Managed reporting for 600+ participants.

ACM Student Chapter – Treasurer

2025

- Managed finances and logistics for technical events.
- Organized sessions on scientific writing and research impact.

Additional Information

- Strong problem-solving and analytical thinking skills.
- Experience with real-time AI applications and deployment.
- Passionate about building scalable AI systems.
